Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Heuling (5009061).

Heuling discloses:

A gathering and picking device for standing plants having useful parts

comprising:

a picking gap defined by a stripper plate, the picking gap having an inlet for receiving standing plants and having a first side and a second side opposite the first side, the picking gap also having a length;

a first gathering element is arranged on the first side of the picking gap and is rotated about a predominantly vertical axis, the first gathering element is provided with carrier elements that are designed to grasp the standing plants as the gathering and picking device is being operated, as well as for introducing the plants into the picking gap and for conveying the plants over at least part of the length of the picking gap;

a second gathering element is arranged on the second side of the picking gap opposite to the first gathering element, the second gathering element also rotated about a predominantly vertical axis and are provided with carrier elements that are designed for grasping the standing plants, introducing the plants into the picking gap, and conveying the plants over at least part of the length of the picking gap;

Art Unit: 3671

a picking unit is operated to convey the standing plants downward through the picking gap so the useful parts of the standing plants are separated from the standing plant by the stripper plate;

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Wolfgang, Wiegert, Wiegert et al., Schreiner et al.
